

SPONSOR SPOTLIGHT!

MERRONBROOK

LEADING TIMBER FRAME SUPPLIERS IN THE SOUTH-EAST

From our base in Hampshire, Merronbrook supplies our trussed rafters, open metal webbed joists, and complete timber frame construction kits to a wide range of clientele across South-East England.

From private one-off house builds to multiple unit housing sites, we are here to help and offer a consultative service which is second to none.

Manufacturer of high-quality Engineered Wood Products (EWP)

Timber Engineering is what we do

Engineered wood products (EWP) have grown in popularity to become the smart choice for builders and developers. As technology has evolved, so have we. We have invested in the most advanced equipment and use the latest practices, always aiming to maintain our high standards of quality, reduce lead times and ultimately reduce costs for our customers.

Communication is key throughout our business, with our design, estimating and manufacturing teams operating all at one facility. This helps Merronbrook provide timber frame, roof truss and easi-joist® packages to our customers, allowing them to engage with us all directly.

Experienced Timber Frame, Truss and Joist Specialist

We have three dedicated design teams to undertake the design and prepare specifications, for the engineered wood product (EWP) range that we manufacture.

Partnering with Wolf Systems, we use their industry-leading design programmes Horizon® and easi-joist® across all our departments, in order to execute high-quality bespoke designs every time for trussed rafter roofs, timber frame structures and easi-joist® metal web floor joist systems.

All our products are constructed to strict standards, achieving high-performance ratings for strength, durability and fire protection. We operate CE Marking and Quality Assurance, through STA and CATG.
